Who was Behind the Navys U-Boat War

Thomas A. Edison, the wizard of invention, heard submarines more than two miles away.

He turned ships without depending on the rudder. He saw thru the ocean by lighting it up below the surface.

These and a series of other things which he accomplished during the war, enabled our Navy to outwit the U-boats.

Mr. Edison was able to keep his latest and favorite invention, The New Edison, within the reach of everyone. How the price of The New Edison has increased less than 15 per cent since 1914, including war tax. Sold by
