Ford
THE UNIVERSAL CAR

The Ford One-Ton Truck

As a matter of fact we might almost as well call it a Three-Ton Truck, for it carries a smaller sized load. The owners of the Ford truck take advantage of the high qualities of materials which are known to be put in the Ford Car, take advantage of the high quality of Ford workmanship which characterizes Ford cars and they overload to the limit. Well, the Ford truck has never broken down with any of these overloads. It delivers expectations and double expectations, so far as carrying capacity is concerned, and while that is not fair to the truck, still the owners are satisfied.

But the Ford one-ton truck, with its aluminum bronze worm drive, its greater weight and strength of frame and its incomparable power plant, is without a reasonable competitor in price, in service, in cost of operation. It is the lowest priced truck on the market, of equal capacity. No other truck on the market operates so economically and we believe there is no other truck that will give us satisfactory and profitable results. Our allotment is limited. Better leave your order without delay.
