

Nearly A Quarter Of A Century Of Service

For twenty-four years the Farmington State Bank has been a factor in the financial growth of this community. We are justly proud of that long record of service.

The added equipment and modern facilities of our magnificent new building will enable us to render a complete and modern banking service to our depositors and friends.

Our new banking home will be opened about February 1st.

THERE'S MONEY IN EGGS

Fresh eggs will be bringing a big price all winter

There are Eggs in good poultry feeds.

If you will call your flock and feed either the Globe, Supreme, Krause or Common Sense brand of Poultry feeds according to directions, you will get more eggs than on anything you ever feed.

FARMINGTON ROLLER MILLS

NEW YEAR'S 1922

Economy, as well as comfort and convenience, calls for an increased use of electric devices in the home the coming year.

Save your money, your time
and your labor by using electric domestic appliances.

COOLING MILK REDUCES LOSS

Natural Ice Can Be Harvested on Majority of Farms and is Most Profitable Crop.

(Prepared by the United States Department of Agriculture.)

Customer—This milk is sour.
Milk Inspector—Your bacteria count is too high.
Cheesemaker—Can't make good cheese out of this milk.
Buttermaker—We can't use this cream.

Hurts, doesn't it? Yet that is what happens regularly every year when can after can of milk arrives at the milk plant or creamery sour. One creamery returned over \$2,500 worth of milk and cream in one year to farmers. A milk plant received nearly 50,000 gallons of sour milk in one year. Why? Because the milk was held and shipped at too high a temperature and the bacteria in it multiplied so rapidly that the milk soured before it arrived.

Cooling milk on the farm will reduce this loss. All that is required is a supply of ice and a little care. Natural ice can be harvested on farms where 85 per cent of our milk is produced, and it is one of the real paying crops of the farm. Few tools are required; and for the average farm two saws, two pairs of tongs, two ice hooks, one pointed bar, and one straight board for marking should be sufficient.

The first thing to do is to provide a place to store the ice. If ice is scarce and hard to put up, it would probably be well to build an ice house, plans for which may be obtained from the dairy division, United States Department of Agriculture. When ice is abundant and easily harvested, it may be cheaper to disregard the shrinkage factor and store it in a pit, cellar, shed, or other place, and insure it with sawdust or shavings. If this is done, 20 to 50 per cent additional ice should be provided to allow for shrinkage.

Where cream only is to be cooled, allow at least one-half ton of ice per cow. For cooling milk, allow 1½ tons per cow. These quantities should be enough to leave a margin for household use; but it is better to have too much than too little. Whenever possible, build the ice house in the form of a cube, allowing 45 cubic feet of space for each ton of ice.

The pond or stream selected for cutting ice should be of about the size of dirt or contamination from barnyards, privies, or refuse heaps. The ice

Cutting ice for Cooling Dairy Products in Summer.

should be kept clear of snow, as snow retards freezing. When it has frozen to a sufficient depth, mark off the surface into cakes of the desired size, making sure that the lines form rectangles. Cut out a strip of ice (with the saw) the width of the cake desired, and force this strip under the ice, thus forming a channel to the landing and loading place. Large strips may then be sawed off and floated to the landing, where they may be cut up into cakes. These cakes are then hauled to the storage place and packed in as close together as possible, and all cracks and air spaces filled with sawdust. Cakes that are cut squarely and are uniform in size and shape pack together with less air space and are convenient to handle.

The cost of ice is small, and the work generally comes during a slack season. There is little reason, therefore, why every farmer in the natural-ice section should not have ice with which to cool his dairy products, and to make such delicacies as ice cream, feed tea, feed buttermilk, feed fruit and vegetables, etc., possible on the farm.

Detailed information on harvesting and storing ice will be found in Farmers' Bulletin 1078, "Harvesting and Storing Ice on the Farm," which may be obtained on request from the United States Department of Agriculture, Washington, D. C.

SALT IS REQUIRED BY COWS

Best Plan to Place It in Boxes in Yard Where Animal Can Lick It at Will.

Salt is required by all animals. The dairy cow requires an ounce or more a day and while she should be given all she needs, she should not be forced to take more than she wants. It is best, therefore, to give only a small quantity on the feed, and to place rock salt in boxes in the yard where she can lick it at will.

Local News

Mr. and Mrs. Bert Hutchins and family spent Christmas with the former's sister, Mrs. Louis Westfall and family, at Plymouth.

Olin Russell and family are Christmas and the fore part of the week with her parents, Mr. and Mrs. Jubb, at Howell.

The O. E. S. will give a dancing party Friday evening, December 30th, at the town hall. Good music and a banquet.

Mr. and Mrs. G. H. Cherry and T. V. Sherman and family of Detroit, were guests at the home of Dr. and Mrs. E. F. Holcomb Wednesday evening.

Dr. and Mrs. Holcomb entertained Monday for dinner, Mrs. F. D. Holcomb, Mr. and Mrs. Alvin Houghton of Redford, and Gladys Cable of Detroit.

Mr. and Mrs. Clyde Adams and son, Harry, spent Christmas with her mother, Mrs. Nauman and sister Mrs. Herbst and family in Detroit.

Mr. and Mrs. Clarence Bicking entertained for dinner Christmas Eve, Mr. and Mrs. J. J. Giehrst of Walled Lake, Mr. and Mrs. Arley Bicking and son of Pontiac.

Emory Hutton and wife entertained for dinner Christmas, Mrs. Martha Hutton and daughter Mary of Ypsilanti, George Grinnell, George Millen and wife and A. C. Balden and wife of Northville.

Mr. and Mrs. Ed Bulson and children left last Wednesday for Geneva, N. Y., called there by the death of her sister, Mrs. Courtney Smith. They will remain there for a couple of months.

Clyde McDermott and uncle William McDermott, and Minnie Toomey took dinner Sunday with Mrs. M. E. Johnson and daughter Mrs. Peterson at Northville Christmas.

Last week the employees of the D. U. R. took up a subscription amounting to \$55 or more for Geo. Cox, who has been very ill for several months. The money was stolen from the Junction by some unscrupulous person who no doubt thinks he can make better use of the money than Mr. Cox. We are in hopes he will hear soon that he has been caught, and placed where he properly belongs.

We wish you, one and all—
Both great and small
A very happy and
prosperous
