

Such a Difference

When things are booming, values are inflated and the dollar you SPEND is worth only about half its normal value. But the dollar that is SAVED at such a time is worth as much as it ever was.

See the difference? That's why this bank has so persistently urged the people to save their money right along. Deflation of values and adjustment of prices do not adversely affect the dollar on deposit. In fact they enhance its value. It pays to save at any time and all the time, especially if your savings are deposited in our reliable Bank.
