**LOCAL NEWS.**  
Division street, south, is closed to traffic while repairs are being made to the D. U. R. crossing. A short detour to the west one block south on Grand River is made necessary.  
Anyone sending news items for The Enterprise must sign their name. Your name will not be printed, but in case something proves to be wrong, we want to know who to go to to make it right.  
Mrs. Elsie Farmer of Pontiac, Miss Clara Waite of Brown City, and Mrs. Bertha Apling of Washington, Mich., spent Tuesday night with E. U. Farmer and family. Mrs. Apling remained for an indefinite stay.  
The rainfall for a few moments Wednesday afternoon in Detroit was unusually heavy, says Henry Steffen, who was on his way home when the storm hit that city. "I never saw anything like it," said he, "in a few minutes there was over a foot of water running on Grand River avenue at Trumbull which put the street cars out of commission for a time."

**GEESSE ARE QUITE PECULIAR**  
Different From Other Fowls as They Must Be Mated Previous to Breeding Season.  
Geese are peculiar animals. They ought to be mated several months prior to the breeding season to obtain the best results, therefore breeding stock should be bought in the fall, and all changes in matings made then. Matings are not changed from year to year unless results are unsatisfactory. And this is the peculiar feature of it. If the matings are changed, it is necessary, usually, to keep the previously mated geese so far apart they cannot hear each other.

**POULTRY NOTES**  
Keep lime always to reach, plenty of gravel or grit and a good dry dust bath for the fowls.  
Give the growing stock all they want to eat. They won't pay unless they grow, and they can't grow unless well fed.  
Separate the males and females. Both will stand the hot summer weather better if separated, and the eggs will also keep better.  
Hens need fresh water as much as do horses. During these hot summer days they will suffer greatly unless they have constant access to it.  
The farmer who fails to save some of his choicest second-growth clover for the hens during the winter will miss one of the best egg-producing feeds we have.

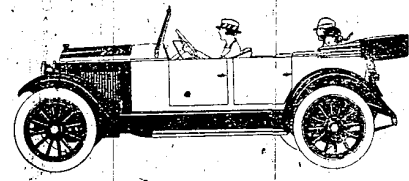

**Forest Resources.**  
The United States possesses about three times as much timber as Canada, and Russia is regarded as much better endowed with timber than the United States of America.  
**Siamese Fighting-Fish.**  
The government of Siam realized a considerable revenue from fish fighting by licensed exhibitions where fish are matched against each other at sporting events. The fighting fish are found in the waters near there, and while not large, they are ferocious and fight to the death.

**Notice**  
The supply of Pure Guernsey Milk and Cream that can be furnished by the Walter Phipps Farm is limited they as they handle only the product of their own farm.  
The price is sixteen cents per quart and it is cheap.

**A Motor that Actually Thrives on Carbon**  
Most people think of "carbon" in terms of trouble.  
It means lost power, reduced compression and expensive repairs in most motors.  
But here is a motor that actually thrives on carbon. The Willys-Knight Motor improves with use because accumulated carbon helps to tighten compression. Quiet—powerful—smooth-running—it is entirely free from the usual motor repair costs. And the motor is as simple and understandable as it is economical. The valve mechanism—for instance—just two sleeves sliding smoothly on a film of oil, instead of noisy, rapid-wearing poppet valves and springs.  
The Willys-Knight is not only beautiful, graceful, easy-riding; it has been built to last and match the quiet motor.
