CALLED GREATEST**375,000 SEE MICHIGAN EXPOSITION—EDUCATIONAL EXHIBITS
HOLD VISITORS INTEREST.**G. W. DICKINSON ANNOUNCES
PLANS FOR NEW BUILDINGS**

Establishing new attendance records that may stand for years—including a wider range of exhibitions than ever before and successful from the viewpoint of diversified entertainment, the seventy-third annual Michigan State Fair which recently came to an end at Detroit marks the beginning of a new era of fairs in this state. The fair accomplished the purpose outlined for it by G. W. Dickinson, secretary-manager, that of being of some educational value to the farmer, for whom fairs originally were created. The present fair administration seeks to do some everlasting good.

Modern Buildings to Replace Sheds.

With the close of the fair which saw the new coliseum building, erected at a cost of \$300,000, put into use, Mr. Dickinson announced the plans for a new sheep and swine pavilion to cost \$100,000. Construction of this is to be started almost immediately.

The necessity of modern buildings to replace the run down wooden sheds and barns which still are to be found on certain portions of the fair's 140 acres will be recommended by Mr. Dickinson in his final report to the board of managers.

Handicapped by low rail strikes and the threatened outcome of the coal situation, the fair horse department established a new record for entries—255 of the finest draft and light horses in the middle west going on exhibition, 129 more than the previous year. This disproves that the horse has given way to machine power.

In the cattle department more than 1000 animals were exhibited. Before the fair got under way, 700 of these animals tested the capacity of the enlarged cattle barns and several hundred more were brought in by the boys and girls clubs from various sections of Michigan.

There were approximately 1250 sheep and 1100 swine on exhibition and about 2100 chickens. Few grains, potato, fruit and flower exhibitions in this section of the country have been as complete as the Michigan Fair's. In the flower shows, amateur displays predominated.

Machinery of 1849 and 1922 Shown.

There probably never was assembled such a display of modern machinery as housed in this machinery hall and individual tents on the fair grounds. Thousands were drawn into Henry Ford's exhibition which occupied more than 12,000 square feet of space outside. There, the motor vehicles had on display not only all of the latest products but farm machinery from as far back as 1849, the year of the original Michigan fair.

Besides the broad exhibits by the United States department of agriculture, American Jersey Cattle club and hundreds of independent exhibitors, the dairy building drew visitors with its butter sculpture work. Baking of pies, cakes and instruction in canning, etc., brought many to the domestic department.

A federal government exhibit, the Michigan Agricultural college work which embodied lectures, the state department of agriculture's display and exhibitions by co-ops and individuals made up the show in the Agricultural building. Garment making, judging of poultry, canning and cooking were other educational features.

An important adjunct of the fair was the work carried on by the boys and girls clubs and the Boys State Fair school. All of the boys were quartered in tents in front of the administration building while the girls were housed in a bungalow on the grounds.

Clean Entertainments Afforded.
The egg laying and milking contests probably drew more attention than any of the competitive novelties at the fair. The Better Babies contest was much bigger, 47 babies being examined the first day of the fair compared to seven for the corresponding day in 1921. Next year the entire east end of the Woman's building will be devoted to this affair.

The Dog show, with more than 350 canine artists, counting drew 20,000 visitors in three days and was followed by a three-day cat show equally interesting. The wild life exhibit near the educational building held the interest of the children. In the educational building were the best exhibits and aquarium. The Woman's Work department with its hundreds of fancy articles and pieces of needle work was also a center of interest.

Rubin & Cherry shows also drew clean entertainment, a big program of vaudeville was offered before the grandstand and in the coliseum building each afternoon and evening. There were six days of running races, three days of auto races and a nine nights of fireworks. The mail service maintained between Chicago and Detroit and Cleveland at 1 Detroit and the tourist camp where 140 tourists were quartered also proved interesting. The official attendance was near 375,000 and stands as a record.

YOU AUTO KNOW

That ordinary soap should not be used on the highly polished surface of the body of the car, because soap usually contains free alkali or lye which enables it to cut the dirt and grease loose, but, at the same time, injures the varnished surface and wears off the attractive gloss which is the pride of the new car owner.

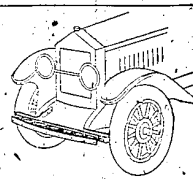

The best method is to use a hose alone, removing the nozzle so that the flow of water comes out slowly and does not tear the grit against the gloss of the car. If a hose is not available, a large sponge and a pail of water may be used, but care should be taken to rinse the sponge after practically every stroke, in order to avoid scratching the finish.

A mixture of a gallon of linseed oil with a half-pail of good kerosene makes an excellent removal agent for a surface which has begun to dull. As this is designed only to freshen up the varnish, the mixture should not be sticky, but sufficiently oily to impart a luster without carrying dust. (Copyright, 1922, by the Wheeler Syndicate, Inc.)

BUMPER WILL PROTECT AUTO

Recently Invented Device May Be Attached to Any Vehicle—May Be Readily Applied.

The Scientific American, in illustrating and describing a bumper, the invention of I. Rosenbergs, 188 St. Nicholas avenue, New York, says: The invention has for its object to provide a construction which may be

The Bumper Into Which I. Rosenbergs Has Built a Plurality of Springs.

used on an automobile or other vehicle, and when in use will protect both the vehicle and the object struck. Another object is to provide a bumper wherein a plurality of springs are provided to present a gradual increasing resistance when the bumper strikes an object. The device may be readily applied or removed.

thought for the Day.
The heart and life of a great triumphant emperor are, after all, only a meal for a little worm.—Montaigne.Giant Berries Found.
Giant berries, looking like blackberries, but dark red in color, have been discovered in Columbia, South America.**LOCAL NEWS.**

H. N. Roys, wife and children and Mother, Mrs. Eva Roys of Detroit, were Sunday guests at the latter's parents, Rev. and Mrs. G. A. Fee.

The regular business meeting of the W. H. M. S. will be held Wednesday evening at 7:30 in the church. Dr. Buckner will talk on, "Work among the Negroes." Everyone is cordially invited.

Mr. and Mrs. Harold Saunders and baby son of Washington, D. C., spent Saturday and Sunday with M. B. Pierce and family. Mr. Saunders is a Lieutenant, Commander of the Navy, stationed in Washington.

Friday evening the Misses Eva and Ida Nelson and Mrs. May Oldenburg entertained their sister, Mrs. W. H. Woodworth of Pontiac, and their cousins, Mr. and Mrs. Glenn Collins of Valparaiso, Ind., and Mr. and Mrs. John Collins and Mr. and Mrs. Everett Collins and little daughter, Edna Mae, of Redford.

Buddhist Ideas of Marriage.
According to the Buddhist faith, the marriage tie contracted in this world will carry over to the next. When circumstances prevent a marriage in this world, many Japanese men and women commit suicide in the hope of a happy married life in the world to come.**LINER COLUMN.**
