Try A Liner—They Will Satisfy

They Always Con Back

By ELLA MAUNDERS

"Going to the club, dear?" little Mrs. Bayfield smiled very sweetly at her husband as he stood in the hall, putting on his coat.

"Yes, not to see a man about a deal," he answered nervously. "Don't sit up for me, Mary."

"All right, dear," answered his wife.

Bayfield strode out of the apartment house, scowling. He was a little annoyed, too. Did Mary suspect of course she was too sure to suspect it? It was a shame. But men and women were constituted that way.

He tried to stir himself to bitterness against her, reflecting that during the 12 years of their marriage she had given him hardly anything that he had expected or loved. The sweet, gentle fiancée had developed into the prosaic housewife. Why was the thing the charm, the companionship? Surely he was justified. At that his friendship with Mrs. Rivers was so very innocent.

They were nothing but friends, and always meant to be. Adela Rivers was separated from her husband, a brute who appeared to have misused her. She had shown him the faint outlines of a bruise on her forehead which he had inflicted in a moment of mad jealousy, and Bayfield had impulsively kissed it. Afterward he had kissed Mrs. Rivers' lips. But that had been a temporary lapse; they were just friends, the best friends in the world.

Well, why shouldn't a man have women friends? Were men and women meant to be mixed up for life together, like in pairs in a cage? If women only understood! But Mary would never understand. He saw the pathetic look on her face when he told her the true filled blue eyes. No, he could never bring himself to tell.

He was shown up into Mrs. Rivers' apartment, not many blocks away. The maid ushered him into the living room. Bayfield was amazed to hear the sound of a male voice. Mrs. Rivers had a caller, a youngish man, ten years younger than Rivers, and about her own age. Bayfield caught sight of himself in the hall mirror as he went in; he saw the gray about his temples, and scowled. He did not like his appearance.

Mrs. Rivers shook hands with him. She had a disconcerting faculty of appearing cold in the presence of others. Bayfield had never liked that; it showed a superhuman self control. All the time he talked banalities with her he remembered that night when they had not yet known each other, and he had held her in his arms and kissed her.

It seemed an eternity before the young man took his departure. Bayfield faced Mrs. Rivers in the living room.

"Well?" she said.

He caught her hands. "Adela, I don't like these men coming to see you. You know I—I'm jealous."

"What have you to say to that, Harry?"

He did not understand. "I thought our friendship," he began.

"Oh, I know all about that, Harry," she answered. "But it's a little hard on me to have a husband on the verge of a companionship that you have time to throw me when you're not attending to your wife, isn't it?"

"I suppose it is," Bayfield muttered.

"You know, Harry, I'm speaking quite frankly now. I tell you, when I deal better than Mr. Brahman, better than almost every one. But a man can't divide his time and attention between two women. And in fact, we've got to write it up, understanding. You've got to choose between me and your wife."

"You mean?"

"That's just what I mean."

"Looking into Adela Rivers' blue eyes, Bayfield felt that he was again in the struggle of his life. It was only for a moment. Something very odd illuminated his mind and brain. Quite coldly he took Mrs. Rivers' hand again.

"Good bye, Adela," she answered, equally cold.

"What fools we are!" muttered Bayfield, as he let himself into his flat.

Mrs. Rivers was waiting up for him after all. She came forward. "My dear," she said, putting her arms around him. "My dear."

Suddenly Bayfield realized that she had known or guessed all the time. And it was nice to have Mary's arms to creep back into when one had been so well, not quite all that one ought to have been.

Wedding Customs in Serbia.

Curious wedding customs still survive in some parts of Serbia. In some districts the bride's father requires that certain conditions must be fulfilled before the gates of the courtyard are opened to the bridegroom and his friends. He may send a good wrestler to challenge any or every man of his prospective son-in-law's party, and one of the wedding guests must overpower the challenger before the gates are opened.

Another condition which is sometimes imposed is that the newcomers are not to be admitted before one of them, by driving a stick, has destroyed a pot or other terra-cotta vessel fastened at the top of the chimney.

YOUR AUTO'S ELECTRICAL SYSTEM

Kinds of Storage Batteries

In the great realm of motordom, there are units and parts galore—some we master by necessity, others we never want to understand. But the operation of the storage battery is one that comes home to our pocket books with a bang and most of us are anxious to know the why's and where-fore of its cares.

True enough, the storage battery manufacturer's job is one of supplying the largest and best battery for the price asked while you and the other car owners look for maximum economy in your battery expenditure—that is, the longest service to be had. Certain fundamental requirements must be complied with, however, before the question of cost can be even considered.

Your motor must be turned over under all conditions and in all kinds of weather—that's the first and most important requirement. The lights and spark plugs must be operated satisfactorily, once the engine starts running. Now, some engines require more electrical current than others, they may be heavier, have better compression, bearings fit tighter or the oil is cold and stiff. To meet these conditions, you have the choice of an eleven plate, thirteen plate and fifteen plate battery with plates of various sizes and thicknesses, and surely one of these will do your work properly.

Of course, the price depends upon the battery you choose but there is a minimum size which will answer your requirements. One smaller than that would be doubly expensive at any price.

The Willard Storage Battery company of Cleveland, has always pointed out the economy of the "over-sized" battery for every automobile. Just as everyone realizes the increased mileage, added convenience and ultimate saving in the use of over-sized tires, the same advantages apply to the use of an over-capacity battery.

Oh Boy! Here's a Battery that Fits the Pocket-book

We used to know a chap who wore two-dollar shoes, fifteen-dollar suits, a dollar watch and threw his socks away instead of sending them to the mending basket. Said he'd a heap rather pay less and buy oftenar.

If he was around her now he'd grab a CW Battery (Wood Separator) and have it on his car quicker 'n scall! We've seen lots of batteries—but never one within gunshot of the CW Battery (Wood Separator), for quality at anything like the price!

Price: for 6-volt, 11-plate, \$15.85

6-Volt — 13-Plate \$19.10

12-Volt — 7-Plate \$24.55
