## SPECULATION

"There are two times in a man's life when he should not speculate—when he can't afford it and when he can."

We have seen and read a good many truisms but never anything more true than the fore-going statement.

Why should a man speculate anyhow, when through careful and persistent saving he can accumulate sufficient for his every need.

Your savings account here will have careful attention and you will receive that friendly service that has built this bank.
