HOT WATER FOR A SONG.

THREE CENTS, TO BE EXACT.

If you've got a gas water heater, a good, 5 minute shower costs you about 3 cents.

And that's about 15 gallons of water.

Enough to give a body something to sing about...at least when you consider what inflation's doing to other current costs.

No, we're not saying natural gas is cheap. But the fact of the matter is that natural gas uses up less of the average family's spendable income now than it did 20 years ago,

heating homes, cooking meals, and warming the water for countless baths and showers. Natural gas - especially when you use it wisely - is still a very good buy.

Baking a turkey for 5 hours in a gas oven today costs only about 11 cents. Doing a load of clothes in a gas dryer runs you about 4½ cents. And you can shower daily for a month for under a dollar.

Yes, the cost of energy as a whole has increased considerably in recent years. But there are still

forms of energy that, in relation to all the other costs of living, serve us well and at a reasonable expense.

At Consumers Power, we wanted you to know that natural gas is one of them. And that we're trying to keep it that way.

NATURAL GAS. It's still a good buy.
