25 MILES PER GALLON AND THE PERFORMANCE OF A BMW.

At a time when the national conscience is consumed with fuel efficiency, the BMW 320i is truly remarkable. With 5-speed standard transmission the 320i delivers 25 EPA estimated mpg and 36 estimated highway mileage. Yet, what makes the BMW 320i even more impressive is that it achieves these mileage figures without ever violating the one thing that makes the car worthy of the BMW marque—extraordinary performance. Press the accelerator and you'll immediately see what we mean. The four-cylinder, 1.8-liter, fuel-injected overhead cam engine responds with a force that is exhilarating even by pre-pollution control standards. On winding roads and tight turns the legendary BMW suspension system—independent on all four wheels—makes one feel as though the car were slotted into the roadway. The interior of the 320i is equally sophisticated. With every facet strategically planned to help eliminate driver fatigue. Before you commit yourself to any one of today's increasingly mediocre cars, commit yourself to a test drive in a BMW 320i. It's proof that performance and efficiency can co-exist under the same hood.

THE ULTIMATE DRIVING MACHINE.

The fuel efficiency figures are for comparison purposes only. Your actual mileage may vary, depending on speed, weather and trip length. Your actual highway mileage will most likely be lower. © 1980 BMW of North America, Inc. The BMW trademark and logo are registered trademarks of Bayerische Motoren Werke A.G.
