

COUNTY PROPOSITION

Parks millage renewal sought

"Shall the constitutional tax limitation on the total amount of general ad valorem taxes which may be imposed each year for all purposes upon real and tangible personal property in Oakland County, Michigan, be increased as provided in Section 6, Article IX of the Constitution of Michigan for a period of five (5) years from 1982 to 1986, both

inclusive, by one-quarter (1/4) mill, twenty-five (25 cents) cents per One Thousand (\$1,000.00) Dollars of assessed valuation as finally equalized for the purpose of acquiring, developing, operating and maintaining parks and recreation areas in Oakland County, Michigan (such increase being a renewal of the one-quarter (1/4) mill

increase which expires in 1981)?"

This proposition is a renewal of 1/4 mill for the acquisition and operation of the Oakland County Parks and Recreation Areas.

The current 1/4 mill was also voted for five years and will expire at the end of 1981. The Parks and Recreation Commis-

sion currently operates the following facilities: Addison Oaks County Park; Glen Oaks County Golf Course; Groveland-Oaks County Park; Independence-Oaks County Park; Red Oaks County Golf Course; Springfield-Oaks County Park—Golf Course; Waterford Oaks County Park—Wave Pool; and White Lake Oaks County Golf Course.

U.S. REPRESENTATIVE

A United States representative serves a two-year term in the lower house of Congress. A representative must be at least 25 years of age and an inhabitant of the state he or she represents. Salary is \$60,662 plus expense and staff allowances.

Candidates were asked to summarize their biographies in 35 words or less and to answer each of these questions in 50 words or less:

1. What steps do you advocate to deal

with the current state of inflation/recession?

2. How can the U.S. best meet its long-term energy needs and balance environmental concerns?

3. What changes, if any, are needed in U.S. foreign trade policies?

4. Do you feel that the defense budget should be increased? If so, how would you fund it?

5. Are you in favor of an amendment to the U.S. Constitution requiring a balanced budget? Explain.

12th District

David E. Bonior

Democrat, incumbent, 35, of Mt. Clemens. U. S. representative to Congress. Education: Attended Sacred Heart Seminary and Notre Dame High School; BA, University of Iowa; MA, Chapman College. Qualifications: Served four years in the Air Force and in the Michigan State Legislature from 1972-76.

1. I support wage and price controls because they would allow us to halt our runaway economy and give it new direction. Voluntary controls restrict wages without limiting health costs or interest rates. To escape recession, I support fair tariffs to protect American jobs and incentives to encourage investment.

2. The expansion of wind, water and solar energy research programs will redirect us from a dependence on foreign oil to energy independence without damaging our environment.

3. While I generally support free trade, it must be fair trade. In the short term, imports must be reduced. Recently, the tariff on light trucks was increased from 4 percent to 25 percent. I support legislation that would impose the same fees on Japanese imports that they impose on our cars.

4. The defense budget should not be based on an increase, but on the proper use of existing funds. Spending on extravagant military hardware drains funds and attention from our conventional weaponry, maintenance capabilities and fair salaries for trained military personnel.

5. I am fearful that a strict balanced budget requirement would unnecessarily hamper our ability to respond to a war, recession or national emergency. Instead, the Congress must continue to reduce the deficit and eliminate the waste and duplication within the government.

Owen Oscar Love

Democrat. Material not available from candidate at time of printing.

Anthony Joseph Polselli

Democrat, 47, of Mt. Clemens. Real estate broker, Michigan Real Estate Company. Education: Valley Forge Military Academy graduate. Qualifications: Primary goals: A strong and earnest desire to see American return to sound and logical standard of honor and respect and solid economics.

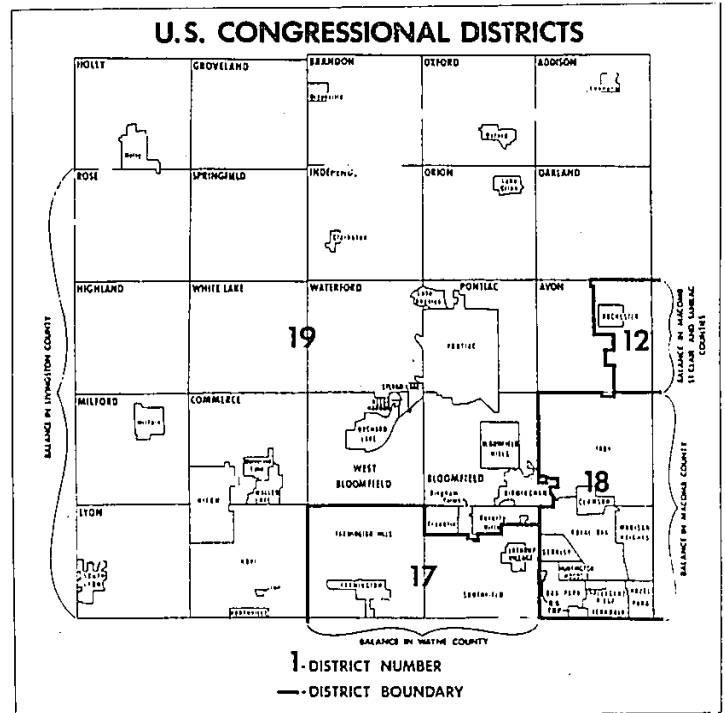

1. We must do all that is necessary to insure jobs and at the same time support American business, while changing any practices that are detrimental or dishonest. To insure quality control and support American industry and see that it is run at an honorable and efficient level.

2. If South Africa can be self-sufficient by turning coal into liquid fuel, why are we not doing it? There are many other alternatives that we bypass. Backing and supporting viable inventions and inventors that show feasibility. Stop scaring ourselves with nuclear nightmare and proceed with its development.

3. American interests first. To deal with others we must first be economically sound and secure. A bit of isolation is not a bad thing. If an import takes jobs from us then stop its import. We cannot cater to other countries if it means our economy goes down the drain.

4. No, but to change the direction on how it's spent, less waste. A budget aimed at submarines and missiles. Create more defense related jobs for Americans. Overstocked than understocked with military hardware is in our self-interest. To insure qualified and sufficient personnel to operate our ships, planes, and missiles.

5. Yes, a balanced budget, make it work, thus stemming the tide of inflation and recession. A dollar value for every dollar spent. Stop wasting monies on foreign countries that are neither our friends or allies. Take care of our own interests and people first, then consider other nations.

Bill Froberg

Republican, 55, of Mt. Clemens. Administrator for the Mt. Clemens Community Schools. Education: MS, Eastern Michigan University; Fulbright Scholar, 1958, Institute of Foreign Studies, Turin, Italy. Qualifications: Almost 30 years in public education, classroom teacher, 17 years, administrator, 13.

1. There should be an immediate freeze on any new spending and a natural and concerted effort to eliminate waste in present spending and making cuts wherever possible in services and programs not essential to people's safety and welfare.

2. We need a full commitment in which we use all available resources, human and natural. We start with effective conservation of what is already available and at the same time promote serious research for the development of alternatives to oil, coal, natural gas, solar energy, and nuclear power.

3. Government should exercise any power necessary to protect the best interests of its manufacturers and producers, but at this time I see no need for us to

over-react to the present imbalance of trade payments by imposing harsh restrictions on friendly nations exporting goods to the United States.

4. Soviet aggressive expansion makes it expedient that the U.S. maintain a high level of military preparedness. This requires research and development of new weapons systems and making certain that trained manpower is available. Funds saved through the elimination of waste and non-essential programs would be diverted to defense costs.

5. The ease with which the Congress raises the national debt limit to satisfy its overly indulgent spending causes me to side with those who favor study of this proposal.

Eugene J. Tyza

Republican, 51, of Mt. Clemens. Machinist. Education: Port Huron. Qualifications: 12th District is a blue collar district. I've been in the work force 30 years, know the problems of the people, whether working people or farmers. Also I was raised on a farm.
