

CUT YOUR UTILITY BILLS!

5 ways to use less fuel:

1

Make sure your attic insulation covers your ceiling joists (an insulation value of R-38 is recommended). That attic should be properly ventilated, too, to avoid excessive moisture damage.

2

Turn back that thermostat! By turning your thermostat down at least 5° at night and when you're away from home for more than a few hours, you can cut your heat consumption by 5%.

Fomofill®

General Purpose Urethane Foam

- Insulates • Fills • Seals
- Bonds • Sound Dampens

SAVE ENERGY: Fills & Insulates gaps, cracks, holes & joints

3

Keep valuable heat in — and unwanted cold out — with a little attention to windows and doors. Weather-strip and caulk all windows and doors including storm windows to cut heat costs even more.

Caulking

For Your Home or Industry

4

Insulate concrete basement walls — insulation foam board will do the trick. Pack insulation batting into the area where the basement ceiling joists sit on the foundation, too. And caulk outside where your siding meets the foundation.

STYROFOAM

for the perimeter,
crawl space &
wall sheathing.

- New or older homes
- Inside or out
