

Wardrobe planning taught

Jan Brock, who brings "Creative Wardrobe Planning" workshops to Farmington Community Center says, "Your clothes make an instant statement about you. They tell who you are, how to feel about yourself and others."

Ms. Brock, who labels herself an "image consultant," says, "If your statement could stand a bit of improvement, consider making an investment in

yourself by joining the class."

The three-session workshop runs from 7:30-9:30 p.m. on Thursdays, beginning Sept. 25.

The instructor is currently a coordinator and consultant for women's specialty shops in Ohio and Connecticut and travels extensively lecturing on "The importance of discovering the right packaging to achieving your potential."

A former fashion buyer for J. L. Hudsons and Saks Fifth Avenue, she

will tell the do's and don'ts of wardrobe planning, discuss the development of individual style with taste, and uncover what she terms "The ways you communicate through your appearance."

Participants will also learn color awareness, how to stretch clothing dollars on any budget and reevaluate their current wardrobe.

"You are the way you look so why not always look your best."

Registrations are being taken now by calling the center, 477-8404.

WET the BED?

FREE INFORMATION ON BED WETTING

Information on Bedwetting - send for a FREE booklet on how to stop bedwetting in the privacy of your home.

"Bedwetting is Serious and Harmful..."

If you have a bedwetter in your home, I strongly urge you to take steps at once to end it. The correction of bedwetting is an important mental health aid. It is very harmful to the child, distressing to the parents and can lead to very serious complications later on in life. Don't be blind to this problem no matter what you have been told by anyone else. Do something about it and do it now.

Joseph G. Molner, M.D.,
Master Public Health

BED WETTING IS CORRECTABLE

Many procedures such as restricting liquids, taking a child to the bathroom on a schedule, scolding, etc. do not end bedwetting. It can be stopped as early as 3 years of age. It should definitely be stopped before school age.

The most serious mistake parents make is to wait for the child to outgrow bedwetting, because there are millions of adults who never outgrow it.
