## Turn it off.

It's a lot easier than you think. All it takes is one Buck Stove®.

The Buck Stove is different from most wood burning stoves. (In fact, it's a whole house heating system.) With a built-in thermostatic blower, it can heat your entire house — up to 3,000 square feet.

Now we can't promise you'll never have to use your furnace. But current Buck Stove owners report savings of up to 80% on their heating bills.

That's nothing to sneeze at. Want to know more? Call or visit the Buck Stove store nearest you.
