'Corn's-a-poppin' and the business is hoppin'

The Detroit Popcorn Co, might sound like small kernels, but don't be fooled, there's a lot more to the company than

the name implies.
To brothers Richard and Robert Jas-

To brothers Richard and Robert Jasgup. Detroit nailves who started with
one popcorn wagon, the Redford comjany is a business which grosses
\$250,000 a month.

The co-owners of the Popcorn Co.,
sell popcorn in every imaginable form
— hybrid seeds to ready made,
caramel or cheese covered, in bags,
bores, and balls — and sell and rent
equipment and supplies for preparing
food or entertainment.

Equipment can be rented for making

" Equipment can be rented for making everything from nachos to funnel cakes

and, of course, popcorn.
 The stockroom on Telegraph north of Plymouth Road is filled with a huge stock of paper party supplies for every

It's a fun business, according to the

*WE REALLY enjoy coming to work, Richard said.
And why not The battering administered to the economy has obviously bypassed their business. When the brothers bought the company in 1989, it grossed \$3,000 the first month. Now a typical month brings in \$250,000.

"Everybody has a couple of cents in their pocket for a box of popcora," Robert said.

"Feople won't give up entertaining themselves," adds his brother.

The Reddord location acquired five years ago is their third. The business outgrew two smaler buildings on Fenkell in northwest Detroit.

The Jasgurs have plans to expand and remodel the present location and a new abow room floor and shelling are already in placed. It's been good to us," Richard said.

THE BROTHERS began with a single popcorn wagon and pedalled popcorn on the streets. Soon they bought ten more wagons, then went looking for a suppler to fill their needs.

"We didn't have food industry experience. We went to the smallest popcorn supply company in town and asked the owner. If he wanted to sell," said Richard. "He did. Now we're one of the largest."

Just five years ago popcorn, cotton

ard. "He did. Now were one. or unlargest."

Just five years ago popcorn, cotton candy, and snow cone machinery were the company's only products. Two years later the Jasgurs added refrigeration — freezers, soft the cream and milkshake machines — and began supplying local ice cream parfors.

A year ago they added their paper party line, everything from throwaway plates and cups to balloons and holiday decorations.

AND IN BETWEEN they boosted their supply of rental equipment to include artique popcorn carrier and many properties. The supply of the supply

A CATALOGUE goes out to 30,000 Michigan consumers.

"Because big users — schools, hospitals, churches, fundralsers, the carnival industry, sports arenas — buy most of it, we can afford to sell the rest of it for low prices."

They don't supply many movie theatres, but do provide popcorn and goods to zoos, circuses and private parties. The Jasgurs supply nachos to the Silverdome and caramel and candy apples to 7-11 stores.

Silverdome and caramel and candy ap-ples to 7-11 stores.

"Hybrid popcorn is the best quality, better than the stuff purchased in gro-cery stores," Richard claims. "All the kernels pop, and they're big."

Hours are 8:30-5:30 Monday through Friday and 8:30 to noon Saturday.

Richard (left) and Robert Jasgur, Detroit natives, started with one popcorn wagen. The company

All I want for Christmas is my computer terminal

The first-ever, computerized Christ-mas is on display now in 12 Oaks Mall, put together by members of the Detroit Science Center, Texas Instruments and the artists and designers of the Novi

the artists and designers of the Novi shopping center.
William Clogg, a Farmington Hills resident and manager of 12 Oaks, called the display, "A classic Christ-mas of the "80s. It captures all the fun and adventure of the computers that most children have access to every day at zchool. And it blends in the feelings of joy and anticipation kids of all ages feel as they wander through a Christ-mas display as they wait in line to see Santa Claus."

Clogg said "There's a high level en-ergy in the air bere as Santa Claus and

Santa Ciaus."

Clogg said "There's a high level energy in the air here as Santa Claus and his elves and the music and magic of the traditional holiday season are seen in a contemporary setting that today's kids understand."

Clogg adults to same tensidation in

kids understand."
Clogs admits to some trepidation in wondering it Christmas and computers would compute into a traditional holl-day display but any doubts were allayed with support that came from the Detroit Science Center, well-known for combining acience and technology in hands-on displays that have entertained young visitors for years. Then later the same support that came from Texas Instruments, leaders in the home computer field.

NESTLED IN between snow covered trees, brightly wrapped packages and mechanical elves of traditional Christ-

lite saucer.

Santa's helpers are a team of computer students from Oakland University, assisting each child of whatever age, on basic home computer consoles. All of the games have been designed by Texas Instruments, to challenge any computer skill level.

What is particularly gratifying for Clogg and the mall staff is that even the very youngest of the visitors are sensing the excitement of creating colors and ahapes on the computer screens.

PLAYING A simple math or word game players receive a reward when the game is completed. In the Create-a-Tree game, for ex-

In the Create-a-Tree game, for example, the computer-user correctly fills in the blanks on the computer monitor with the correct holiday phrase and a dazzling Christmas tree with blinking lights appear and the computer then sings out 'O, Christmas Tree.'

Meanwhite Carrette State of the Correct holiday by the computer then sings out 'O, Christmas Tree.'

Tree!

Meanwhile Santa's Helpers from the Detroit Science Center are demonstrating the concepts of computer basics called "Explorations and Transportation," which is a look at the space pro-

Getting a warm, fuzzy feeling of Christmas from a computer was no small challenge for Larry Molloy, a computer science instructor at Oakland Community College, when he was asked to help on the technical end of putting the display together.

"Getting people to sit down and be comfortable is one thing. But we set our goals higher. We wanted them also to have a positive traditional feeling about their experience at the computer presentation, be said.

"We think we got it. And we bope that parents can seem policinal for each of the computer of the computers."

"State of the computers of the computer of the computer of the computer size of the child who completes the program, a

warm fuzzy Christmas feeling is guar-anteed."

12 OAKS hosts a program and party for families and children of all ages with the computerized Christmas dis-play, roving robots, a carol sing-along with a 800-voiced combined high-school choir, free refreshments and a Texas Instruments bome computer give-away

The party and program run from 8:30-9 p.m. in 12 Oaks Center Mall. 12 Oaks is located at the intersection of Novi and 12 Mile, north of Interstate 98.
