**Now you see 'em. .**

These fiber form columns, called sonotubes, revolve to become storage units. These were placed on turntables and cut in half lengthwise, leaving one side round and solid. The other half opens for shelves and cabinetry. Lights and a sound system were installed. Formica is used to cover them. Sonotubes, which give the effect of columns, retain the feeling of space and provide storage areas which can be hidden.

## Call Scotts turf hotline

Homeowners who want a quick answer to a specific lawn care question can dial the consumer service department hotline of the O.M. Scott & Sons Co. The toll-free number is 1-800-543-TURF.

service WATS system in the country. The staff of lawn specialists answer 12 lines during weekday hours. For the second year, more than 100,000 calls were answered last year.

Scotts also handles more than 200,000 written requests for information a year.

Scotts operates the largest customer

## Does Your House Look Older Than It Should?

Look at your plantings — Do they dwarf the house? Are they bare and shabby and over-grown? If so, perhaps you need re-landscaping. Our designers will give your home a new look to fit your special needs — and your pocket book.
