Fifty years old?

Why...you haven't changed at all.

But your circumstances have changed. And perhaps your life insurance should, too. Because now your children have grown up. Retirement is closer. And you may even have money left over at the end of each month. Now is the time to adjust your life insurance to your changed circumstances.

What about a lifetime income for your wife? Three out of five wives outlive their husbands.

What about estate taxes? With today's inflated values you probably have a bigger taxable estate than you think. Retirement savings may be subject to death taxes, too.

And your retirement? Retirement years can be most satisfying, if you have enough income.

The Man from Manufacturers Life will show you how life insurance can supply the answers. For example, it can insure a comfortable retirement. It can supply immediate cash after death to pay estate taxes. And it can provide your wife a comfortable life. You may not have changed. Your circumstances have. Shouldn't you review your life insurance with the Man from Manufacturers Life?
