### Warns Against Using Galvanized Utensils

Galvanized Utensiles
Galvanized iron utensile sometimes
cause poisoning of those who of rink
liquids that have been stored in them,
according to a warning issued by the
bureau of chemistry of the Utalian
tareau. Instance of poisoning resulting, apparently, from the presence of
sinc, 12 men at the fluam mayil istation had each drains a bottle of root
beer and immediately began voiniting.
Chemical examination of the jeontents of three of the bottles disclosed
the presence of substantial quantities

the presence of substantial quantities of zine satis reach bottle. Experiments carried on by federal chemists with quantities of lemonated water. Washington city rap; water and distilled water held overright in galvatized from backlet proved that zine onlandation occurred in each case.—Sileatille American.
