Very Quick Murder Trial!
In a recent murder trial in Montreal the jury was sworn in, the case presented, and a verdict of not guilty returned, all within a period of ten minutes.

Side Walls of "CREO-DIPT" STAINED SHINGLES
For a True Colonial Effect
Especially the large 24" shingles, with heavy butts, laid with 10" exposure give an effect unequalled by other side wall material. Using random widths varying from 4" to 12", the monotony of a plain side wall is overcome. They are laid so as to break joints and provide a double thickness of these heavy "CREO-DIPT" Stained Shingles. This means a weather protection not afforded by other materials; a warmer house in winter, cooler in summer. The artistic advantages and the adaptability of "CREO-DIPT" Stained Shingles are beyond comparison. There are many color treatments possible. For true colonial treatment, "Dixie White" gives all the soft texture of Southern whitewashed shingles without the "painty look" so often noticed in wide clapboard and painted shingle work. The silver gray treatment is also considered very attractive and weathers beautifully.
"CREO-DIPT" Stained Shingles are cut from vertical grained red cedar thoroughly seasoned, and treated by a special staining and creosote oil preserving process. Permanent stains made from finest earth pigments (no aniline dyes) are ground twice in pure linseed oil and carried into the wood fibers. They will not cut, race, warp. Let us furnish samples of colors on wood and prices.
