OLD FARMINGTON ROAD

LOCAL NEWS
Mrs. E. F. Holcomb spent Mon-
day in Detroit.
Mrs. Clyde Adams was a busi-
ness visitor in Detroit Tuesday.
Born to Mr. and Mrs. Ralph
Markel, a boy, Saturday, May 24th.
Born to Mr. and Mrs. Elmer
Hobbs of Northville, a boy, May
19th.
Mr. and Mrs. Carl Follmer
and son of Detroit, were Sunday
guests of their daughter Mrs. Olga
Hoffman.
Among the sick are Mrs. Robert
McCrumb, Hugh Upton, small son
of Mr. and Mrs. Jack Smith, Mrs.
Ernest Each and Mrs. Haines of
near Franklin.
Mrs. W. H. McLean was the
guest Tuesday of Mrs. E. M. Mc-
Lean of Walkerville, Canada, at
a bridge luncheon at the Beach
Grove Country club.
Mrs. Olga Hoffman was given a
surprise by a number of her neigh-
bors Friday evening in honor of
her birthday anniversary. She
received many nice gifts. The
refreshments were served in con-
clusion.
Mr. and Mrs. Mark Harger of
Pine Lake, Mr. and Mrs. John
Harger of Detroit, and Mr. and
Mrs. L. C. Harger of Farmington
attended the funeral Thursday at
Ortonville, who was accidentally
drowned in a well Tuesday. Burial
at Grand Lawn cemetery.
Mr. Carl Hatten and sister Mrs.
Charles Ely attended the farm sale
of William Wedow in Franklin on
Monday afternoon and in con-
sequence had the opportunity to visit
the old home where they lived as
children. Their parents Mr. and
Mrs. R. H. Hatten bought this
farm about 1855 and owned it for
nearly 15 years.

dress Box 43 Redford. 29-1
FOR SALE—Yellow Dent. Seed
corn, guaranteed. Inquire H.
C. Thayer, phone 23-F-2. 29-3

BETTER BEEF BY
ELECTRIC PUMPS
FARMS AND CITIES
A MODERN CONTRAST
Make Fresh Water Possible,
and Iowa Man Finds Cattle's
Weight Gains Accordingly.

It has been established conclusively
in the practices of successful farming
that fresh water, as distinguished
from standing water, means better
live-stock. And it has now been es-
tablished, in addition, that an elec-
trically operated pump system on the
farm is so efficient in providing a
supply of fresh, running water, that
it is comparable with that finest of
all water supplies—a natural spring.
The experience of an Iowa farmer

In the thinly settled regions are
many folks who yearn for the time
when electricity will reach them.
This is made plain by a letter which
appeared in the Michigan Patron, of-
ficial organ of the Michigan State
Grange, a short time ago. This cor-
respondent said:
"Reading about the Grange investi-
gation of water power for farm use
has got me thinking about the incon-
veniences of our present opportunities.

Electrically Operated Water
Supply System for Farm Use.
For instance, for three weeks I've
been commanded to lie in bed and
keep absolutely warm. Even though
it has been 12 degrees below zero
part of that time, at any moment I
might do two things—with one hand
I could reach up and by a twist of my
fingers flood my room with brilliant
light, while with the other hand I
could turn a current of heat into an
electric pad at my side. Thus some-
where, perhaps out in a distant river,
water was working to send me light
and heat.
"But I happen to know that, not
many miles away there are farm men
and women dairying by lantern light
and gasoline power. And I think, too,
of another farm woman who lives so
close to a city she sees its twinkling
lights every night. One night at
Grange the lecturer asked this woman
to tell what she'd do if she had \$10
to make her work easier, and she stood
up and named more improvements
than \$1,000 would install—all elec-
trical. Among other things she said:
"Every member of my family needs a
lamp to study or work by every night-
and every morning I must wash and
fill those lamps. What a help it would
be to me to be spared this daily
task!"

PUTTING HOSPITALITY
INTO THE LIVING ROOM
Electricity Allows Attractive Lighting and Reading Nooks,
Say General Electric Specialists.

There is no special reason why the
"best room" of a farmhouse should
not be an attractive living room, which
the farmer and his family can enjoy
every evening instead of a formal par-
lor, never used except when the par-
son comes to make his semi-annual
call. A living room is meant to live
in, to spend leisure time in, and on
the farm, as well as in the city, most
of the leisure time comes in the eve-
ning—especially the long winter eve-
nings.
With electric lights a farmhouse liv-
ing room can be made as pleasant as
happy, as any room in the house. This
isn't so easy, however, with the center
gaze fixture or with a center fixture
that combines gas and electricity. Nor
can it be done successfully if the wiring
is not sufficient to allow a bit of
variety in the lights.
Bright Lights, Artistic Fixtures
The illustrations show specimens of
living room lights which are good
lights and art: the same time cheer-
fully attractive and artistic to
see. Glass-shaded pendant lamps in
the center of the room are economical
and fairly decorative. The lamps
about the room, that is, in the frosted
bells should be used to decrease the
glare.
There are other styles of fixtures
that are even better looking. And
some folks like semi-indirect fixtures,
which give a wonderfully mellow, soft
glow, no glare at all, while the light
floods over the whole central part of
the room. An electric lamp of high
wattage—100 to 150 or even 200 watts
—is necessary with a fixture of this
sort, and that, of course, means more
consumption of electricity and conse-
quently a greater expense, but the de-
lightful illumination which results is
considered worth the cost. The shades

for such fixtures are pleasingly de-
corated and can be made to harmonize
with the room decorations.
Indirect and Local Lights
The principle in such an arrange-
ment, as pointed out by lighting au-
thorities of the General Electric Com-
pany, is one of reflected light. The
light itself shines directly on the ceiling
and is reflected downward upon the
room without, the slightest glare
nor any shadows. A white ceiling or
one of light tint is the best for such
a plan as this.
But a fine, clear, mellow light from
Left—A cozy corner with elec-
tric lights. Below—One way of
lighting the living room.

Add Another Room
Smaller rooms are easier to heat and
care for. Make over that "oversize"
room into a music room, a breakfast
nook, a den—anything that you need.
Remodel with Sheetrock, the different wallboard.
Solid and enduring as rock—yet sawed
and nailed like lumber. Erected quickly, without
dirt or muss.
Sheetrock gives a uniform wall surface that
can be papered, painted or paneled to harmonize
with existing decoration.
Sheetrock makes enduring walls that never
bulge or warp. Effectually resists heat or cold.
