Concrete Pavements **Grow Stronger** Year After Year

Assays show the ore to be very fich, containing 18 per cent of mercury, and preliminary excavations indicate that the vein increases in thickness the deeper it is followed. It is should make Japan independent of the rest of the world for its supply of mercury.

Orthographical Hint

When you vote for a paved road or street, you want to know that you won't be called upon for assessments every now and then to repair or rebuild it.

Built according to present-day high standards, Concrete roads and streets permanently withstand the heaviest ounding and grinding of modern traffic. In fact, they grow stronger year after year,

That is because their definitely pro portioned mixture of sand, pebbles or broken stone, and water, is held together by the everlasting grip of that tenacious binder, portland cement.

Concrete Pavements have the repair built out and the maintenance built in. That is why they pay you handsome divi-dends in satisfaction and service.

Firm, rigid, unyielding, and bei vee Firm, rigid, unyielding, and the last world in paving economy, Concrete Roads and Streets are also skid-proof. And their color is a pleasing, light gray—an-other very important advantage, especial-by for nicht driving ly for night driving.

Watch for advertisements telling about the Watch for advertisements telling about De many other yees of concrete. And remember that the Portland Cement Association has a free personal service to offer you. Whether you use concrete or have it used for you, this ser-vice will give you more for your money.

Our booklets R-3 and R-4 test many interesting things about Concrets Roads and Stretts. Which one would you like us to send? There is no charge.
