Not Firstborn Children
It has often been said that first-born
children are the eleverest in the famthy, bur the careful investigation of
the Society of Bavarlan School Teachers upsets this theory. An inquiry
into 74 cases of prominch presonalties of the pristic and literary world
showed that immong thenis were onlyten first-born children. The vast.majerty were late-born offspring. Fenimore Cooper was the eleventh of
twelve children; Honore Balzac; the
youngest son of his parents; Napoleon
Bonaparte, the eighth child; Benjanig
Franklin, the youngest of seveniene;
Richard Wagner, and Wolfgang Amadeus Mozart heefth of 1sts kildren;
Ribbert Schuman, the fifth, and Igfans
Schubert, the thirteenth of fourfeen
children. The lavestigations thus show
that a rather-indvanced sige of the parents seems to be more favorable to
the production of greet personalities.
