The Stubs of Your Check Book Tell a Story

The stubs of your check book tell a story. They tell where your money went—whether it was spent wisely for needful things or wasted for luxuries.

Each one forms a little chapter in the record of your affairs.

You can trace your progress in the story they tell.

Do you realize the value to you of a check book which gives you a permanent record of all bills paid? It encourages a methodical handling of your affairs and leads the way to success.

MODERN METHODS

There is quite a difference in running a two room apartment in New York and in running a farm. And yet, there is a similarity. The modern woman buys food that is especially prepared to serve easily. So does the farmer. We carry a line of specially prepared cattle feed that is the delight of the modern farmer.

IF YOU ASK THE GROCER which is the very best flour he will point to a sack of ours. So many experienced housekeepers will take no other that he knows it must be superior to all others. His conclusion is correct and you'll be wise to accept it and order a sack. It costs no more than other flour so why not get the best? Ask for Gildemeister's Peerless, Gildemeister's Delight.

Golosh

Is Great Britain, and especially in England, that article of footwear which in Canada is known as a rubber, is called a golosh. It is an old word and was used by the poet Chaucer, who spelled it guboch. Of course, he did not mean a rubber shoe, because no such thing then existed. He meant a coarse overshoe, in some cases made of leather, and in some cases made of wood. Without doubt the word was carried to England from Spain and is a form of the Spanish word Gotocha, meaning wooden shoe; and the Spanish word is said to be derived from the Latin word gallicae, meaning Gaulish shoe that is, a shoe worn in ancient Gaul, modern France.

MAKE YOUR LAUNDRY WORK EASIER

A badly lighted basement is merely a cellar. Yet hard work is done there. Badly placed or insufficient light on washing and ironing means eyestrain; and eyestrain causes nervous fatigue or exhaustion.

You can easily have the kind of light that makes the work go quickly and smoothly—light that shows those tiny wrinkles near seams, where careful ironing is necessary. Use a 150-watt Mazda bowl-frosted daylight lamp, or a 100-watt bowl-enamelled lamp in a suitable reflector. And have a similar lamp and shade over the work bench. In other basement sockets, use 60 or 70-watt Mazdas.

Come in and let us tell you more about this.
