

Matching Action to Thoughts . . .

BOTH FARMERS AND
THIS BANK ARE
DOING JUST THAT.

If farmers were lacking in acts, or if you were lacking in foresight and the insight into the country's needs, just imagine what a fix this country would be in.

But to the glory of the farmers stands the fact they put action behind their planning—and thoughts of progress ahead of each year's work. So the nation's greatest industry advances. We are proud of this privilege of cooperating with the farmers of this community—an honor, we feel, won by our helpful, interested understanding of their banking needs, and our ability to meet them fully.

COMPLETE OVERHAULING

Many motorists are fast learning the value of having their cars thoroughly overhauled at regular intervals.

Fewer repair bills, better mileage and longer service repay you many times the price of overhauling.

GIVE YOUR CAR NEW LIFE

Don't wait until your car stops running before putting it in the shop. The more you run it after it commences to get "balky" the more harm you are doing it, and the more it will cost to have it put in good condition again.

We can do a thorough job—and do it quickly. Now is the time.

GOOD PROGRESS MADE

At the quarterly business meeting of the First Baptist Church, January 28, as reports from each department were read, it was a great pleasure to note the substantial gains in each. Especially our Sunday School. Attendance and offerings both being far in advance of any previous record. Our Willing Workers Society, when a few bills are paid, will have the largest balance in their history beside helping the church they are giving one tenth of proceeds to missions, part of which goes to the new Baptist Children's Home. All departments show a vigor and growth not known at any other time on record.

By Order of Church.

Compass in a Ring

A finger ring with a tiny compass set in place of a stone, forms a novelty that is said to be useful to electricians in testing high-voltage lines and in examining structures and stators in motors to determine their positive and negative poles. In appearance it is an attractive gold ring, with a little circular window in the top through which the needle of the magnet compass is easily seen.
