## Handicapping The Customer

If a storekeeper should keep a supply of smoked glasses at hand and politely insist upon every one of his customers wearing a pair while in his store, he might be thought to offer a little discouragement to buying.

Yet this, in effect, is just what a good many storekeepers are doing, without realizing it. Their lighting is inadequate; it is unskillfully arranged; it is imperfectly utilized; it is depressing to the spirit of the customer.

If your sales are not what you believe they ought to be, the trouble may easily lie in your lighting equipment. You should find out. Call for one of our engineers to make an inspection. This service costs you nothing.
