

Just Like a Fire Cracker!

The first advertisement in any advertising campaign in this paper is simply the fuse. If you light it and then smother it by discontinuing further advertising, you will never reach the point where results will commence to be heard with a bang. We have the cuts and copy to aid you in the preparation of a campaign that will bring you big results—but you must be willing to use space regularly, week after week. You can count on our active co-operation to help you in every way we can.
