

Add Something to the Total
Each Pay Day

I have tried a number of different plans of saving, and I have found that there is only one that will assure my having a certain amount of money saved at the end of the year and that is to put a predetermined amount of my pay in my Savings Account the first thing I do each pay day. If you'll try this plan I know you will like it. The Bank pays me 4% interest on my balance every six months.
