

Treasures of Memories The Home Provides

Home ownership is a blessing for the family. The youngster born beneath a roof owned by his father collects precious memories every year of his life. And eventually he comes into ownership of the homestead—and his children carry on.

Yet only thirty-two per cent of the people of the United States own their homes. The other sixty-eight per cent pay rent—in ten years they put out the cost of a house and lot, but all they have to show for it is a bunch of receipts.

Get ready to buy your home.

Start saving—even a dollar a week will help.

Let this Bank help you build up the fund.

BUY EGGS NOW FOR

WINTER USE

Eggs bought now and preserved for winter use means approximately a five dollar saving on this one item of food alone to every family in Oakland county, according to the Blue Valley Creamery Institute. This statement is based on figures showing that the price of eggs is generally twice as high from November to February as it is in June.

The practice of putting away eggs for winter not only bespeaks economy but should also induce a greater consumption of this almost ideal food, states the Institute in explaining the preservation process. Two four-gallon stone or earthenware crocks, capable of holding twenty dozen eggs, will be found sufficient for the average family. They should be first cleaned and scalded with boiling water. The eggs are then placed end down and a cooled solution of

water glass sodium silicate), one quart to nine quarts of water that has been boiled and thoroughly cooled, is poured over the eggs to close up the pores in the shell to prevent the egg liquids from evaporating. The topmost layer of eggs should be kept covered with the solution to a depth of at least two inches at all times. The crocks are then placed in a cool dry place after being tightly covered with waxed paper to prevent the evaporation of the solution.

Enterprise Liners bring results.

An Enterprise Liner will sell it.

COOLNESS FOR A CARFARE

There is really only one method of keeping cool, comfortable and efficient in the hot summer months—making a breeze. And a delightfully cool, refreshing, steadily-blowing breeze can be had at the touch of a button and the cost of a very few cents.

Make your home comfortable in the hot weather. Eat, read, rest, sleep, in the pleasing, health preserving air currents of an electric fan. An ice-cream soda costs fifteen cents and cools for five minutes; an electric fan sends streams of coolness for the whole day at less than half the cost.

You can buy fans cheaply and on easy terms. Come in today and let us show you.

THE DETROIT EDISON CO.

**GOOD CHICKEN FEED
IS IMPORTANT**

It's all right to let your chickens grub around for some of their food, but don't forget that their main sustenance must come from a carefully prepared, well-mixed special poultry food. Our GLOBE FEED provides that in generous measure.
