New Ideas in Mental

Tests for Children

Tests for Children
In some of the elementary English
schools, today, mental tests are made,
and gauged by the quickness shown in
solving certain problems presented pictorially. One test, known as the Portorially. One test, known as the Portorially, One test, known as the Portorially, One test, known as the Portorial specific progressively in difficulty, are printed
on separate sheets, and the pupil is
told that they show the paths in a
garden surrounded by walls. He must
find his way out by the quickest route.
The showing made depends on his
pupil's ability to work under pressure
and to withstand distraction by the standard of the pupil is

No Dust-Free Air

Dust-free hir does not exist anywhere in nature, though it can be obtained by certain-filtering devices in
the laboratory, says Nature Magazine.
From the earth's surface up to regions
far above the highest clouds every
cuble inch of hir contains dustmotes.
Near the earth the dust is mostly
blown up from the soil by the winds.
Far aloft the millions of meteors thatenter the carth's atmosphere everyday contribute their quota of fine solid
matter. Lastly, every great explosive
volcande eruption spouts up enormous
quantities of dust to great heights.

FEDERAL RESERVE HELPS FARMERS

How Its Aid to England's Return to a Gold Standard Bene-fits American Agriculture.

By M. A. TRAYLOR

the recent return of Great Britans to a good and and off. discussion of the process of the gold value for the bank of England. The farmer sells his wheat to the elevator man and yet the roal buyer, in many cases, is an Englishman, a frenchman, a German, or an italian. About one-third of the wheat crop is usually sold abroad and the foreign buyer as the collection. Buyer there are many stress, in recent years the most important step has been that at which the foreign buyer has to pay the American experient. For the International mechanism of payment has been badly out of order because Europe was off the gold standard. It was just as though an English buyer as though an English buyer and the foreign buyer has to pay the American experient. For the International mechanism of payment, has been badly out of order because Europe was off the gold standard. It was just as though an English buyer and the contract. But when you discussed payment, he said; fifth sorry I haven't worth its face value in gold. I don't know what it may be worth next worth its face value in gold. I don't know what it may be worth next work but have changed in value for gold the contract so must be contracted on since the Armistice. In practically all countries except the United States the currencies have had no fixed value in gold, but have changed in value fing gold, but have changed in value from day to day, whenever one country sold anything to bancher country, someholdy had to take the risk of loss because the value of the most process of the world's trade as had to be carried on since a faried to do any insper international business than they had to a gold the sold that the sum of the country. The country sold anything to handle sold the sold that the sum of the country of the country of the country of the country of the

FEAR POTATO BLIGHT

WILL FOLLOW RAINS
Possibility of a costly outbreak of late blight among Michigan stotakes is being pointed out by the crops department at the Michigan State College, the weeks having provided ideal conditions for the appearance of the diseases.

"The potato crop is already airly short," says H. C. Moore, potato specialist with the college textension division, "estimates by the United States Department of Agriculture placing the 1925 production at one hundred five mition bushels less than last year. Loss from blight would be felt more seriously than usual, therefore, and added care should taken in caring for the crop.

"The best-control measure is to spray with Dordeaux Mixture is agond high-pressure machine to get the spray on the user should the spidemic of blight in Michigan."

"Use a good high-pressure machine to get the spray on the user is should asked in caring for the crop.

"The best-control measure is to spray very week, When it is raining rather frequently, it is even safer to spray very week, where the blight usually starts.

"Use a good high-pressure machine to get the spray on the user is should asked in caring for the crop.

"The best-control measure is to spray wery week, where the blight usually starts.

"Use a good high-pressure machine to get the spray on the user is should asked in caring for the crop.

"The best-control measure is to spray every week. When it is raining rather foreign to should be effective against the leaf hoppers, which seem to be present always.

"The blight is one of the worst potato diseases in its effect result in great damage. It, has been welve years since the last bad possible to the present should asked to the present should always.
