## CARD OF THANKS

I want to thank the neighbors and friends for kindnesses shown me during my long illness.

Mrs. H. Kahrl.

## Canaries Good Imitators

All canary birds are not naturally good singers and the best are developed by placing them, when young, near to older birds which have become good singers. While the birds are being trained to sing the room is usually darkened. In 1924 more than 1,500,000 canary birds were imported from Europe and the Orient.

## San-Yak

## PILLS FOR DIABETES

Stomach, liver and bowels. Strict diet not required. One pill at night lends unusual good rest.

## How Ships Will Be Salvaged

Italian government engineers have approved a plan for raising from Lake Nemi near Rome the pleasure galleys of Emperor Tiberius who died in 37 A. D. It is believed that these galleys are well preserved and that they will throw much light on the social life of the Roman nobility of that period. The question has attracted the attention of archeologists for centuries. Even as early as the sixteenth century a scientist named Alberti risked his life in an attempt to raise the ancient vessels. About thirty years ago Professor Maass, who spent years on his project, devised a machinery which raised valuable pieces of bronze and marble. But it was found impossible to raise the galleys because of their great weight. By the new plan the lake will be drained by cutting a tunnel through the side of the extinct volcano crater in which the lake is situated. The project will probably cost \$100,000.—Pulitzer Magazine.

## How Birds Know the Way

One of the many explanations that have been offered to account for the fact that migrating birds are able to find their way by night and in cloudy and foggy weather is that they are sensitive, in some way, to currents of terrestrial magnetism and, therefore, direct their flight by the magnetic meridians, says the Popular Science Monthly. This suggestion was put forth by M. A. Thaller, a French pigeon fancier, who declares that carrier pigeons make poor flights during the occurrence of magnetic storms. He also asserts that the general use of wireless telegraphy has diminished the reliability of these birds to a surprising extent.

## How City Got Title

Atlanta received the title of "The Gate City" at a banquet held in Charleston, S. C., in 1870, according to Robert F. Maddox in a speech at Mayor Sims' dinner to visiting railroad officials at the Baltimore hotel. "They had a big celebration in Charleston when the railroad from Charleston to Memphis was completed," Mr. Maddox said. "Atlanta and other cities sent representatives. Atlanta was an inland city, while the others were located on navigable waterways. The mayor of Atlanta was called on to respond to the toast, 'Atlanta, the Gate City of the South,' and the city has held this honorable title ever since."

## How to Repot Plants

House plants, such as geraniums, begonias and ferns, need occasional repotting. The top edge and bottom of the old ball of earth should be removed and, fresh soil used in repotting. Always place a piece of broken pot in the bottom to aid in drainage. Do not fill the pot to more than a quarter an inch from the top.

## Nelson "Hero of Nile"

Horatio Nelson, the celebrated English admiral, is called the "Hero of the Nile" for his destruction on August 2 and 3, 1798, of the French fleet that lay at anchor in the harbor of Aboukir.

## LINER COLUMN.

FOR RENT—Farm, 175 acres, located one-half mile north and three-fourths mile west Elm station on Schoolcraft road. Inquire of Fred Schroeder, Plymouth, Mich. Phone 94R.

## A PROPHECY

## Ten Years Hence

every east and west section line road in the territory bounded by Farmington on the North, Plymouth and Northville on the West, Michigan Avenue on the South and the Detroit City Limits on the East, will be great business thoroughfares or Super Highways, 120 feet wide. There will be far more traffic upon these avenues than there is on Grand River Avenue between Farmington and Redford at the present time because Detroit will have doubled its population and the land lying between will be much more densely populated.

That is, in a nutshell, our reason for being so positive that Frontage upon these Thoroughfares will then be worth more than Grand River Avenue Frontage is today. In fact, we believe it will be worth approximately twice as much—and Grand River Avenue Frontage between Farmington and Redford is now selling for an average of \$125.00 per foot.

This is why Subdividers are finding a ready market for their frontage along these highways at \$50.00 per foot.

For many years conservative people, lacking vision, have been calling investors in this type of property "suckers" but in the great majority of cases these "suckers" have realized more than 100 per cent per annum on the actual money invested.

Today, we are announcing the sale of 700 feet of Frontage on the Base Line Road just off the Farmington Road, at \$22.50 per foot with 10 per cent down and it has a depth of 250 feet.

\$10.00 will make a reservation. Be sure and see us today. Tomorrow may be too late and you cannot afford to neglect the season's best investment opportunity.
