**An Open Letter**

Farmington, Mich., Oct. 1, 1925

To Enterprise Readers:

Two years ago today I opened Farmington's First Real Estate Office. A number of business men who had lived here many years and KNEW FARMINGTON did not believe there was enough real estate activity here to support an office.

But I have succeeded far beyond my most optimistic hopes. Today, Farmington supports three real estate offices and a dozen men.

I did not have a thorough knowledge of Farmington, but I had a knowledge gleaned from five years of Real Estate experience in the Grand River District of Detroit. Each year I noted the growing tendency on the part of the better class of home-loving, American people to live in some good residential suburb. This is the key to the future growth, development and prosperity of this community.

Two years ago it was almost impossible to sell Farmington Real Estate to Farmington people, but I did sell a few of them my first year, and up to the present time more than twenty of them have resold at a price that netted from 100% to 5000% interest per annum on the actual money invested and not one of these buyers has lost a cent.

When considering your next real estate investment we believe this record should be weighed carefully by you. We want to serve you as we have served others, and we have never been in a position to give our clients safer and better investments.

Yours for a Better and Bigger Farmington.
