Goodbye moths

Small, odd-shaped closets sometimes found in an older home or apartment can be converted into a moth-free storage place for winter woollens. Aromatic rod-cedar closet lining is applied to the walls and floor to make the closet "off limits" to destructive moths. Cedar shelving helps to create new space for storage of sweaters, blankets, furs and valuable boxed items. A brochure on How to Build a Cedar Closet is available free by writing Home Closet Planning Service, 221 N. LaSalle, Chicago, IL 60601.
