top three priorities for public education for the school district?

1. Work with the new superintendent to ease the change of administration. 2. Implementation of Education Excellence Committee Report, which will strengthen education at Clarenceville. 3. Work towards reinstating programs which had to be cut because of the budgetary restraints of the past several years.

2. In view of the downsizing of enrollment in your district, what do you see as a future for the Clarenceville school system?

Declining enrollment is beyond the control of local school districts. The important criteria is to maintain a quality education with a diverse curriculum that will challenge all students. I do not believe that Clarenceville's enrollment will decline to the extent where school curriculum or education opportunity will be threatened.

3. Do you support the efforts in Congress for school prayer or tuition tax credits?

I do not support either effort. However, I do not feel there is sufficient space to permit a more detailed answer.
