TROY CHIROPRACTIC HEALTH CENTER

3468 Rochester Road • Troy • 689-5340
(4 Blocks North of Big Beaver)

What Can I Expect When I Visit The Chiropractor?

This is a question many people have asked. Come with us on a brief tour of the Troy Chiropractic Health Center. Each of our patients receive a thorough consultation and examination. X-rays may be utilized to help determine the exact location of the problem. After all of these findings are reviewed and evaluated the patient will be cared for with the finest chiropractic procedures available. In our clinic every patient is an individual, and every case important. If you've been bothered by poor health, call our office TODAY - 689-5340.

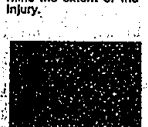
1) Our consultation is designed to determine the nature of your problem and how we may help you.

2) Neurological and spinal examination helps to locate the problem and to determine the extent of the injury.

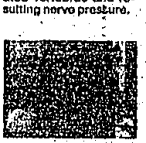
3) Precision X-rays, when necessary, help to determine the exact location of the subluxated vertebrae and resulting nerve pressure.

4) Findings from your exam and X-rays are personally reviewed by you and your doctor.

5) After review of findings, gentle, specific adjusting techniques will be utilized to help correct your condition.



6) Also available, the highly specific toft.ess, hon-force technique for our children and senior citizen patients.



7) Our Chiropractic Assistants are highly trained and will be glad to answer any questions you may have.

8) Most insurance cover chiropractic care. If you have any questions about your coverage, come in or call 689-5340 and talk to Lynn.

CALL FOR AN APPOINTMENT • 689-5340
