

Computer Gets Night Lodgings

The Automobile Club of Michigan and all other AAA motor clubs across the nation are now linked to a computer network which is providing members immediate, guaranteed lodgings reservations anywhere in the U.S.A.

Heart of the new system is a computer center located at McLean, Va., where room inventories for all participating AAA hotels, motels and resorts are stored and automatically

adjusted as reservations are made by AAA clubs via toll-free telephone lines.

Using high speed computers and other electronic equipment, the guaranteed AAA Reservations program now enables any Triple-A office in the country to make reservations for members at any participating hotel, motel or resort, within a few moments. The service is free to members.

"Over 800 AAA offices and thousands of subscribing accommodations facilities across the U.S. have been programmed into the computer and are now at the service of members," Jerry E. Fisher, AAA's touring manager, states.

HE ALSO considers an assured accommodations reservation to be "a definite plus" in travel safety. "A motorist

who has a reservation is usually in no hurry on the road, because he knows a room is waiting for him at his destination," he said.

"Because the system is so new, however, it may not always be possible to make a reservation at a specific accommodation," Fisher points out, "but thousands of popular establishments in all parts of the nation already are partici-

pants, with more being added daily."

"This is a major advantage of AAA reservations over most other systems which usually offer only one establishment in an area," Fisher said. "The computer does the job of searching for an alternate of equal quality, thereby relieving the member of a time-consuming, sometimes expensive and fruitless chore."
