Automotive technology?

This is the cutting edge.

The 5000S. More than an automobile, it is the most aerodynamic luxury sedan in America. The result of six years of research and testing in wind tunnels across Europe.

Beginning with the sculpted "aero" shape, Audi engineers have taken the elements into their own hands and have harnessed the wind. Every angle has been carefully considered to shape the Audi 5000S into its optimum aerodynamic design.

The silhouette is so slippery and clean that it literally improves road-

handling characteristics. For the first time, the incompatible elements of steel and glass assume a smooth, aesthetically clean contour. The windows bonded to the body frame virtually eliminate air turbulence and wind noise.

So advanced is the design, handling approaches that of some exotic sports cars. 0 to 50 acceleration takes place in a mere 7.5 seconds.

The Audi 5000S. The cutting edge of automotive technology.

The art of engineering.
