**THE PRESENCE OF THE BODY**

Anthropologists have found the existence of a religious or communal rite of passage accompanying the disposal of the deceased in every society. Though these rites vary in many particulars—including religious content, method of disposition, rituals of mourning—they almost all have in common the presence of the body during the rite.

The presence of the body at the traditional funeral usually involves the viewing ritual, and the embalming of the body is an intricate part of that practice in America. Embalming for open-casket viewing of the body is a method of preserving the body for a limited period.

Embalming is routinely done by the mortician unless the survivors specifically insist that it not be done. It is legally mandatory, however, if the body is to be transported by common carrier. In some states embalming is also required if there is more than a forty-eight hour interval between death and disposition.
