"Kathy's family needed hope."

A young mother with a serious illness. Her family in crisis. They came to Harper Hospital and found new hope. They learned that Harper is a university-based research and teaching hospital. A place where scientists work alongside physicians, transforming discovery into treatment. They found that Harper concentrates on the tough adult cases in cancer, heart disease and serious vision disorders.

Patients like Kathy come to Harper Hospital at the Medical Center with confidence. They come because Harper is a major participant, together with the Sloan-Kettering Institute in New York and the M.D. Anderson Tumor Institute in Houston, in America's network of only twenty Comprehensive Cancer Centers. Patients know that if the diagnosis is cancer, there is no better place to be than Harper Hospital. And they come with confidence because the Kresge Eye Institute is at Harper Hospital. This important Medical Center resource is devoted exclusively to the problems of vision. And through its research and clinical work, the Kresge Eye Institute gives new hope to millions with impaired vision throughout the world.

Harper is hope for heart patients, too. Its large scale, nationally recognized program brings together research, teaching, surgery and medicine. More open heart surgeries are performed each year at Harper than are performed at any other hospital in Michigan. But of more significance is the growing number of heart patients Harper is able to treat successfully each year without surgery.

For Kathy and her family. For you and your family, Harper Hospital is Science. Research. Hope and Healing.

Harper Hospital

AT THE MEDICAL CENTER.

SCIENCE / RESEARCH / HOPE AND HEALING

Affiliated with the School of Medicine, Wayne State University.
