Cancer is often curable.

The fear of cancer is often fatal.

If you're afraid of cancer, you're not alone. The same people are so afraid that they won't go to the doctor when they suspect something's wrong. They're afraid the doctor will "find something." This kind of fear can prevent them from discovering cancer in the early stages when it is most often curable. These people run the risk of letting cancer leave them to die.
