

Student interns designing news show

Lark Samouelian is executive director of the Southwestern Oakland Cable Connection.

By Lark Samouelian
special writer

Central Michigan University may be proud of this hardworking group of interns. They are demonstrating the meaning of teamwork in their motivation and excitement stem from the fact that this is the first opportunity they have had to lend a business perspective in conjunction with their video involvement. We have asked them to consider our clients for the summer.

They will design a news show format with resident participation throughout. The format will emphasize 10 minutes of local hard news, then 20 minutes of special features.

Segments may include historical buildings, recreational themes, neighborhood watch, senior citizen apartment, capital punishment and gardening as well as reacquainting residents of functions available that are needed on one's daily errands.

Most segments will include asking opinions of citizens as well as explaining how the issues may affect our community.

TAMARA VICCHY is the executive director. Her role is to coordinate the team, determine what news will be covered, crew, edit and produce segments.

John Enright is the technical director who will coordinate the production crews and guide them on location shoots. He will also produce segments. Anna Dealey will interview and train residents for talent. Reporting on-camera and writing while producing segments will also be her emphasis.

Robin Nominell will proof all copy and report on-line as talent. She is keeping her ear to the ground for pertinent news for our SWOCC Newsletter.

PLEASE CONSIDER yourself invited to participate. Call with whatever your level of interest is. Any functions taking place this summer may send their information to the SWOCC News Team, 23600 Liberty, Farmington Hills 48024.

Watch our schedule for the News Show to be seen on June 24 and 26; July 8 and 10; July 22 and 24 and August 5 and 7.

Metropolitan of Oakland County's public-access programming for the week of May 28.

Weyerhaeuser Lifetime Treated Lumber GUARANTEED 2 WAYS

1. Guaranteed For Durability

Under pressure of 40 lbs. per cubic ft. (40 retention) waterborne preservatives are permanently forced deep into the cellular structure of the wood. This lock-in preservative gives us lifelong protection against termites, rot and decay. This protection assures your outdoor project has been built with quality treated lumber, whether in ground or above the ground.

2. Guaranteed For Appearance

We are so confident in the appearance of our treated lumber when used for your deck top or railing that we guarantee your satisfaction. If at any time of treated lumber (deck, railing) is not suitable for your deck top or railing due to color defect, simply return the piece and receive a new piece and a "Buck (\$1.00) a Board" for your trouble.

THIS PROGRAM SUBJECT TO TERMS & CONDITIONS POSTED IN STORE
