Walsh College... where careers happen.

- The Master of Science in Finance**
The M.S.F. is an alternative to the traditional M.B.A. It offers a more specialized curriculum in finance, while still providing graduate education in business.
- Designed by business, for business**
The M.S.F. was developed by financial and industry leaders to meet the needs of today's financial community. Educational flexibility was built into the program by offering concentrations in corporate finance and financial planning.
- Convenient**
The M.S.F. is designed to fit your personal and work schedules. Courses are offered in the evening and on the week-end throughout the year. The program is structured for those currently employed who seek upward mobility, and want to earn a graduate degree on a part-time basis.
- Take the first step**
To begin working towards your M.S.F., contact the Office of Graduate Admissions. They will provide you with the necessary information you'll need to begin the program.
