# \$86 WATERBED

<p>Need what sleep researchers say? Every night you go through a sleep cycle composed of four stages. The two most important stages are REM (Rapid Eye Movement) and Deep Sleep. If you wake up during either of these stages, you will feel tired and groggy. The Waterbed's unique design allows you to sleep in a position that is most comfortable for you. And, every time you turn and turn, it prevents you entering the REM stage. So you wake up feeling refreshed and ready to go. So now, though you may have had a bad night of sleep, you will wake up feeling refreshed and ready to go.
