WHAT FASHION'S ALL ABOUT

## Makeup matches muted tones

New freshness is the fashion makeup look for fall.

**T**HE FASHION collection for fall features darker colors than has been in the news for some time.

Ranging from black to charcoal to pale grey and silver with touches of cream and white, they're very strong and make quite a dramatic statement.

Glittering new makeup reflects the changes.

From Chanel for fall comes a dynamic array of beige shades. Colors with a new freshness — dazzling rods for lips and nails, glistening pinks and peaches for the cheeks. And eyes — more alluring than ever before in khaki green, gray pearl and frosty pink and white.

THE MIRA LINDNER look is soft and muted, she says. "The right palette depends on age, hair color and the time of day or night," the fashion colorist notes.

Classic earth tones of ebony, brown, burnt orange, burgundy and sand are used to enhance the natural shape and color of the eyes.

"Moss green and deep purples intensify the look for evening," she adds.

Lips, said Linder, make a bold, pouty statement when lined with deep shades and filled in with transparent color.

"Cheeks appear barely colored in glowing and luminescent shades of fuchsia, purple and burgundy which are lightly applied."

The look of fall makeup is chic, classic and elegant, adds makeup artist Kitty Wagner. "It's toned down to soft, romantic shades to complement fall fashions. Daytime foundations are ivory or ivory rose, with rose, mauve and pinks for cheeks. Eye shadows are pink, mauve, garnet, deep plum and violet."

Lip veil, a sheer color in lipstick form that adds a touch of sheer color in pink, rose or red, gives lips just the right highlight, Wagner said.

"For evening, the colors are copper, deep blue and gold dust on the cheeks, on eyes and gold glaze.
