

Cable consumers must communicate needs

Our column is usually full of high energy information and news about what is happening in local television production in Farmington, Novi and Farmington Hills. Equally important, however, is your ability to receive a clear strong signal to view "the screen."

The Cable Commission office is primarily targeted to help insure that this condition is prevalent throughout the cable system. Metrovision is the cable company servicing our franchise area. Customer service and relations is crucial to their business.

Alas, you the consumer have a responsibility as well. The line of cable television, be it the profit or non-profit, is the business of "communications." You the consumer must communicate your needs to the company so it may have the opportunity to address a specific condition. There are several alternatives to the consumers of cable: One may ex-

press oneself via telephone, drop by or send written correspondence.

After selecting the alternative that suits your life pattern, if a situation continues not to be addressed, then our Southwestern Oakland Cable Commission staff may be contacted and we will try to help.

The cable industry at large is duly affected by climatic conditions as well as the public utility of electricity. The industry engineers are continually tweaking and tuning the cable system to keep the level of signals high. Consumers are an important variable within this telecommunication medium as your questions and concerns may indeed trigger an enhancement of services that will improve and challenge any variety of conditions.

Therefore, let our partnership flourish as we communicate with one another. We are here to help.

Thinking for two.

Parents-to-be are more assertive today about their hospital choices. They want to be certain about the quality of the hospital experience for both mother and child. The medical aspects are most critical, but comfort, friendliness, family involvement, and privacy are also important. So families check things out for themselves. It's not just the doctor's choice anymore. That's why hospitals are talking about their differences. And the differences at Grace are significant. Grace is a teaching hospital. And that means patients receive more attention from more professionals. It also means that patients see improved procedures introduced sooner.

Grace is a leader in the prenatal, neonatal and high risk pregnancy specialties, but normal deliveries get lots of special attention, too.

A wonderful private birthing suite for families seeking an alternative to the more traditional delivery room program is available at Grace. Private rooms are also available. And at Grace, mother and infant are cared for together under a long established maternal bonding program. Families are encouraged to tour the Grace maternity section before making a hospital decision. And parents-to-be can use the Grace physicians referral program to find a conveniently located Grace affiliated physician.

Thinking for two means planning ahead. We think Grace should be a future mother's first thought.
