

Even though we now manage \$100 billion, some people still think of us only as a great insurance company.

Not that there's anything wrong with being a great insurance company.

It's simply that we are a group of companies that do a good deal more than insure over 25 million Americans.

We manage over \$100 billion in assets.

We are one of the largest real estate investors, with over \$2 billion invested in this country. Plus, we manage over \$50 billion in pension funds making us one of the leaders in the field. And our investment banking and brokerage house makes us a major player on Wall Street.

We also have strong capabilities in equities and fixed income investment management, mutual funds, foreign, mortgage banking, agribusiness, and group health insurance.

And in all, we're the 3rd largest asset manager in the nation.

Oh, lest we forget, with all this modesty, we're also a great insurance company.
