

### 'Brains' plus beauty

High-IQ electronic appliances are being incorporated into a Detroit Edison "dream kitchen" in one of the 12 homes in Homearama '87. The refrigerator "thinks" and monitors itself, the range cleans itself and cooks faster, the microwave oven prompts you with words so you can give it cooking instructions, and the dishwasher takes its own temperature while it scrubs your pots and grinds up the soft food you were too lazy to put down the sink disposer. All of these General Electric appliances are found in Villa Amore, built by husband-and-wife builder team James and Janet Compo of Farmington Hills.
