

Reaching users of community access

Community access television policies have been printed and are available for those involved with our television and radio offerings.

The policies expound upon: the guiding principle and purpose, availability of channels, studio and equipment availability, use of studio and portable equipment and van, studio use, van use, access programming and scheduling procedures, program ownership and copyright, censorship, programming workshops, student interns programs, executive director's responsibilities and videotape use.

It is our intent to maximize the diversity of programming options available to our access user and cable viewer. There are so many practical details that we do not absorb until a situation creates a need or questions, which are readily clarified within the policies.

For example, you work and are not available evenings during the

week. Saturdays are your only option. Well, did you know that the studio facilities may be open on Saturdays with one week notice?

Read carefully and discover the marvelous options open to you, the community access user.
