# Invest in time beforehand in planning landscape

AP — You can create an attractive and imaginative landscape, even if you want to do as little maintenance as possible, landscape architect Thomas Wirth said.

"It's important for homeowners to invest time beforehand in choosing landscape plants and construction materials to reflect their personality and be compatible with their life style," said Wirth, author of "The Victory Garden Landscape Guide."

He has these tips for easier maintenance:

- Plant trees and shrubs in areas where they'll grow well with little upkeep. Group together flowers and shrubs that require similar amounts of watering, weeding and fertilizing.
- Space water faucets no more than 100 feet apart, so every area can be reached with 50 feet of hose.
- To make lawns easy to mow, in-

stall sand pits around trees and "mowing edges" along flower beds so there'll be no areas that must be trimmed by hand.

- Work with easy-care plants that are natural to this area. Plant slow-growing and dwarf plant varieties that don't require much pruning.

- Don't plant trees and shrubs that litter a lot of fruit and leaves, requiring clean-up.

- Choose maintenance equipment and tools that fit your needs. Those with larger properties can make maintenance faster and easier with a riding lawn mower or lawn tractor. On small lawn areas, use a more maneuverable mower.

- Keep all equipment organized in one convenient location, such as a shed with an easily accessible entrance. Make walkways wide enough for easy transporting of lawn mowers, edgers and tillers.

Early spring application of new Preen 'n Green eliminates weeds for the whole season, while feeding new and established evergreens and acid-loving shrubs.
