Implants can provide many benefits. They can enable you to have renewed confidence in your smile. They can allow you to chew and enjoy food with ease and comfort. In certain cases, with the aid of dentures, you may gain a more youthful appearance. Your speech may be clearer, than with less stable removable dentures. In fact, you may find that your dental implants are your own natural teeth.

Dental implants can also:

- Provide extra support for remaining teeth
- Stabilize removable dentures and eliminate the need for denture adhesives
- Eliminate many full or partial dentures
- Stimulate bone growth
- Strengthen existing bridge work
- Replace single teeth in selected cases
