MEET YOUR FEET
Dr. Daniel Salama, Podiatrist.
Feet Facts: Heel Pain
 Heel Spurs: Faulty foot function is a primary cause of heel pain; over a period of time, excessive irritations lead to heel spurs. Heel pain may occur from too much stress on the heel bone from walking, running, jumping or landing on hard surfaces, or when the plantar fascia is inflamed. Even too much stress within a short period of time (as in sports participation) can create heel distress. Unrelieved, or excessive, stress, stretching causes inflammation that pulls little pieces of bone away from the heel. Podiatric treatment, such as taping, strapping, heel cushions and orthotics, can relieve these symptoms and correct structural deficiencies or muscle imbalances.
 Also treating bunions, corns, calluses, ingrown nails, warts, heel pain, and diabetic feet.
